YieldSense AI — Playwright End-to-End Test Report

Execution Timestamp: 2026-10-12 02:52:28 | Target: http://localhost:5173

TOTAL TEST CASES	TESTS PASSED	TESTS FAILED	TOTAL DURATION
5	5	0	8.81s

ID	SCENARIO & VERIFICATION SCOPE	RESULT	DURATION
TC-01	**Farmer Authentication & Session Integrity** Verified commercial farmer login (farmer@yieldsense.ai / Farmer@123), authenticated session state, and presence of Ramesh Patil profile badges.	PASSED	1.82s
TC-02	**Multi-Crop Random Forest ML Inference & MSP Valuation** Configured Cotton(lint) in Maharashtra (Kharif season, 25 ha, 2,500 kg fertilizer, 75 kg pesticide). Verified modal output: 2.45 t/ha yield, 61.25 t production, Rs. 4,361,000 MSP revenue.	PASSED	2.14s
TC-03	**Agro-Climatic Meteorological Telemetry & Smart Advisory** Validated 4 live sensor cards for Maharashtra: Ambient Temp (29°C), Relative Humidity (68%), 24h Precipitation (12 mm), Soil Moisture (72%). Dynamic irrigation directives verified.	PASSED	1.45s
TC-04	**Commercial Ledger Multi-Tenancy Data Isolation** Verified strict tenant isolation: Ramesh Patil only sees his personal farm predictions. No cross-tenant data leakage detected.	PASSED	1.10s

ID	SCENARIO & VERIFICATION SCOPE	RESULT	DURATION
TC-05	**Administrator Governance Audit & Multi-Farm Ledger** Logged out farmer, authenticated as Tejaswini Dalavi (admin@yieldsense.ai / Admin@2026). Verified Master Platform Audit Ledger, farmer filtering, and active session tables.	PASSED	2.30s

✓ **Test Execution Verified:** All 5 automated end-to-end test scenarios passed with 100% success rate. The agricultural prediction engine, weather telemetry cards, tenant data isolation, and administrator audit console operate flawlessly without errors.
